17. SITUATIONS NOT COVERED IN THE CODE

Ethics is the set of rules and principles of the value system and moral order of an individual, a social group, or a society. That is to say, it is the set of principles that governs human social coexistence, inside and outside the company.

This Code is intended to guide our employees to make decisions and act in accordance with the good moral practices we advocate.

Human society is an infinite set of daily interactions and therefore impossible to list in its entirety, so there will be situations in everyday life that are not addressed in this document, which may generate doubt or temptation. Thus, the fact that an occurrence is not covered in this document does not mean that it is correct, nor does it mean that the Company agrees with the conduct.

When you face a situation where it may be unclear how the Code applies, you are encouraged to reflect and discuss with other coworkers, and ask yourself the following questions:

- Does the law allow me to do it this way?
- Do I feel my actions are honest and impartial?
- Could I do it and tell my family, colleagues and superiors at work without feeling bad about it?
- Will this maintain the integrity of the company, my colleagues and all others involved?

If the answer is “**NO**” to any of the above questions, we recommend that you do not do it and seek guidance from your supervisor.
